**Re: Round 46 Call for Applications for Forestry Futures Silviculture Projects**

I am pleased to invite you to participate in the forty-sixth (46<sup>th</sup>) call for applications for funding from the Forestry Futures Trust (FFT). We encourage you to submit applications for eligible work. The deadline for Round 46 applications is February 5, 2018.

The Forestry Futures Trust Committee would like to remind applicants of the following underutilized activities that are eligible for project funding:

- 1) Pre-project assessments: Pre-project assessments are eligible as a Forestry Futures funded expense for approved projects. This funding is available for no greater than 10% of the total project cost (pre-HST).
- 2) Supervision: Supervision is eligible as part of the Forestry Futures funded expenses to allow for greater flexibility in project budgeting.

As in previous rounds, applicant contribution is required as a demonstration of commitment to the project. Applicant contribution may include in-kind and/or cash allocations. Generally, contributions on approved projects range from 10-25% on natural disturbance projects and 20-50% for stand improvement projects. Reasonable levels of applicant contribution that may differ from the above values will be considered on large-scale projects. As in past years, eligible claims cannot exceed approved amounts.

The *Project Application Guide* document (available on our website and attached to this letter) outlines information the Committee requires and uses to evaluate projects and prioritize funding allocations. Please use the most current Project Application and Budget Forms (dated September 2017) for Round 46 which can be found under 'Download Forms' on our website ([www.forestryfutures.ca](http://www.forestryfutures.ca)). Applicants are required to submit a shapefile, along with before and after pictures, with the final project work report.

When claims for eligible silviculture work are submitted, the Trustee will be issuing cheques for payment in separate envelopes. One cheque will be for 90%, cashable immediately, and the second cheque is for the remaining 10% post-dated for 45 days.

Priority is given to funding eligible projects on productive (Site Classes 1 or 2) and operable sites with proximity to primary roads. Among the categories of eligibility (refer to *Project Application Guide*), the Committee encourages applications under Category 2: Stand Rehabilitation after Natural Disturbances, Sec. VI: Stand

Recovery, to revitalize degraded stands. Such projects may be eligible for a harvest top-up as part of the Forestry Futures Trust funding request when sufficient evidence is presented to support a need for this supplement. Where reduced stumpage rate is already in place, please document in your applications.

Please submit applications electronically including signatures and seals to Attn: FFTC Chair at [admin@forestryfutures.com](mailto:admin@forestryfutures.com).

All information contained in your Project Application and supporting documentation is considered public information subject to the application of the Freedom of Information and Privacy Act R.S.P. 1990. c. F. 31, and is collected under the authority of the Act.

A submission containing incomplete information or in which key elements are missing will be returned to the applicant. Some opportunities for revisions may be provided on a case-by-case basis. Each applicant will be advised, in writing, of the Committee's decision by March 2, 2018. If you have any questions concerning the application process or wish to update your business contact information, please contact Shelley Vescio, Programs Coordinator, at (807) 344-8851 or myself through the office at 343-5803.

Yours sincerely,

R.A. Riley, P.Eng., R.P.F. (Hon)  
Chair, Forestry Futures Trust Committee
